WOODWEB's CNC Forum - Message Index

G-code (also RS-274), which has many variants, is the common name for the most widely used numerical control (NC) programming language. It is used mainly in computer-aided manufacturing to control automated machine tools.. G-code is a language in which people tell computerized machine tools how to make something. The "how" is defined by g-code instructions provided to a machine controller ...

G-code - Wikipedia

Metal fabrication is the building of metal structures by cutting, bending, and assembling processes.. It is a

value added process that involves the creation of machines, parts, and structures from various raw materials. A fabrication shop will bid on a job, usually based on the engineering drawings, and if awarded the contract will build the product.. Large fab shops employ a multitude of ...
