Whole language describes a literacy philosophy which emphasizes that children should focus on meaning and strategy instruction. It is often contrasted with phonics-based methods of teaching reading and writing which emphasize instruction for decoding and spelling. However, from whole language practitioners' perspective, this view is erroneous and sets up a false dichotomy.

A taxonomy is a nothing more than a classification system that arranges elements within a field of science according to their relationships. As educational psychology progressed in the early 1900's, researchers sought to improve methods of teaching and learning by classifying the response and reaction to information and mapping intellectual functions.
