Surveying or land surveying is the technique, profession, and science of determining the terrestrial or three-dimensional positions of points and the distances and angles between them. A land surveying professional is called a land surveyor. These points are usually on the surface of the Earth, and they are often used to establish maps and boundaries for ownership, locations, such as building ...

Lidar (also called LIDAR, LiDAR, and LADAR) is a surveying method that measures distance to a target by illuminating the target with pulsed laser light and measuring the reflected pulses with a sensor. Differences in laser return times and wavelengths can then be used to make digital 3-D representations of the target. The name lidar, now used as an acronym of light detection and ranging ...

The later versions of the PLGR and all the DAGR GPS receivers have a North Finding function (the DAGR calls it Gun Laying System). There are two methods, one uses a single GPS receiver and the other uses two GPS receivers. They replace the AG8 in most applications providing the same accuracy for a lot less money, volume and weight.
