In finance, technical analysis is an analysis methodology for forecasting the direction of prices through the study of past market data, primarily price and volume. Behavioral economics and quantitative analysis use many of the same tools of technical analysis, which, being an aspect of active management, stands in contradiction to much of modern portfolio theory.

I drew a chart juxtaposing the Bitcoin hash rate with the market availability of mining ASICs and their energy efficiency. Using pessimistic and optimistic assumptions (miners using either the least or the most efficient ASICs) we can calculate the upper and lower bounds for the global electricity consumption of miners. I decided to do this research after seeing that so many other analyses ...
