The metric system is an internationally recognised decimalised system of measurement. It is in widespread use, and where it is adopted, it is the only or most common system of weights and measures (see metrication). It is now known as the International System of Units (SI). It is used to measure everyday things such as the mass of a sack of flour, the height of a person, the speed of a car, and ...

Overview. EIA's International Energy Outlook 2018 (IEO2018) focuses on how different drivers of macroeconomic growth may affect international energy markets in three heavily populated and high economic growth regions of the world: China, India, and Africa. To perform this analysis, EIA updated the IEO2017 Reference case with new macroeconomic information and varied macroeconomic assumptions ...
